

# Simple Weighing with the New Sartorius Entris Balance

publication date: Aug 1, 2014 | author/source: Sartorius Group

[Previous](#) | [Next](#)

Sartorius introduces the new Entris, a balance that focuses on the most commonly used weighing applications and dispenses with costly additional functions.

The Entris analytical and precision balance is available in 15 models, covering a weighing capacity from 60 g to 8,200 g with a readability of 0.1 mg to 0.1 g.

## High Accuracy, Easy to Operate

With Entris, users get a reliable balance in the well-known Sartorius quality. Most models of the new Entris family are equipped with a monolithic weighing system featuring external adjustment or an internal, motorized adjustment function. That is how this Sartorius balance delivers consistently accurate weighing results which are easy to read on the backlit, high-contrast display. The logical key assignment on the Entris and its clearly structured user interface both make daily routine weighing much easier. The Sartorius balance is equipped with applications for density determination, animal weighing, counting, conversion and weighing in percent and supplied in the languages German, English, French, Italian, Spanish, Russian and Polish. The draft shield and stainless steel parts are easily removable, thereby making the Entris quick and easy to clean.
