WELLINGTON LABORATORIES

Standards for Environmental Testing and Research

2016-2018

CERTIFICATE OF REGISTRATION

This is to certify that

Wellington Laboratories

345 Southgate Drive, Guelph, Ontario N1G 3M5 Canada

operates a

Quality Management System

which complies with the requirements of

ISO 9001:2008

for the following scope of registration

The Registration covers the Quality Management System as it applies to the design and provision of reference standards and chemicals for use in environmental analysis and toxicological research.

Certificate No.:	CERT-0074195	Original Certification Date:	December 30, 2004
File No.:	1039334	Current Certification Date:	December 27, 2013
Issue Date:	October 16, 2013	Certificate Expiry Date:	December 26, 2016

TRUSTED FOR QUALITY SINCE 1980

This year marks the 36th anniversary of Wellington Laboratories Inc. (Wellington) and we are proud to present our newest catalogue. Moreover, we are very pleased that we have been able to continue to provide you, our clients, with high quality products, efficient service, and knowledgeable technical support. Thank you for your trust and loyalty, and rest assured, they are well-placed.

In this catalogue you will note that many of the products from our previous catalogue have been retained. This is either due to their popularity, continued scientific relevance, or mandated use in regulations from various jurisdictions. Some products have been discontinued; however, inventory of these products may still be available. Please contact Wellington, or one of our distributors, if you are interested in purchasing withdrawn products and we will do our best to accommodate your request.

You may also note that we have added a number of new products, many of which were announced in our newsletter The Wellington Reporter. You can subscribe to receive these new product announcements by e-mail on our website (www.well-labs.com).

All of our products have been prepared according to detailed procedures that comprise our Quality Management System (QMS) which has been registered to ISO 9001. In addition, Wellington is accredited to ISO Guide 34 for reference material production and ISO/IEC 17025 for our testing and calibration activities. Up-to-date certificates for all of these registrations/accreditations are available upon request.

Finally, as you have or will come to know from our products and research activities, Wellington is a very dynamic company. This is largely due to our staff, who are all highly qualified and have somewhat diverse, yet complimentary backgrounds. Most notably, they are all still excited by the science behind our products.

We trust that our products, service, and overall dedication will give you…
An Added Measure of Confidence

As many of you may have noticed, polar bears are often utilized as a Wellington 'sub logo'. They are beautiful animals that are endangered primarily due to human activities. They have also acted as sentinels; contaminants that have been found in their tissues have essentially warned us that certain chemicals are persistent, bioaccumulative, and subject to long range transport. In a way, we are somewhat indebted to them.
The artwork used in this catalogue is dedicated to the polar bear. Each picture is an original created by a local Canadian artist in the medium of their choice. The contributing artists are acknowledged throughout the catalogue. We hope that you enjoy their interpretations and talent.

PCBs: SPECIALTY SOLUTION/MIXTURES

POLYBROMINATED DIPHENYL ETHERS & POLYBROMINATED BIPHENYLS

HALOGENATED FLAME RETARDANTS AND RELATED COMPOUNDS

TABLE OF CONTENTS

APPENDIX

"*SUPPORT SOLUTIONS*"

Throughout this catalogue, among the products listed are sets of Calibration and Verification Solutions designed for use with a variety of GC/MS applications. These solution sets or kits are denoted by the incorporation of the code CVS into their catalogue numbers, for example **EPA-1613CVS** or **DFP-CVS-B10**.

These calibration solutions are designed to be used with their corresponding "support solutions". These are the solution/mixtures of native or mass-labelled compounds required for sample processing and method validation as determined by the appropriate method.

As an example, the support solutions for **EPA-1613CVS** are:

EPA-1613LCS	for sample spiking prior to extraction;
EPA-1613CSS	for extract spiking prior to cleanup;
EPA-1613ISS	for spiking of the cleaned-up extract prior to analysis; and
EPA-1613PAR	a native spiking solution for method performance testing.

Some sets of calibration solutions in this catalogue (e.g. BDE-CVS-G) were designed by Wellington, with input from clients, and not for a specific method. Support solutions for these are noted where applicable.

GENERAL INFORMATION

WELLINGTON LABORATORIES INC.

Wellington Laboratories Inc. (Wellington) is recognized world-wide as a reputable and trusted source of certified reference standards of organic compounds of environmental concern.

The majority of our products are used for trace analysis or toxicological research and thus their quality is vital. This quality, as well as the success and longevity of the company, is primarily due to our people. Wellington has a well-qualified, dynamic mix of synthetic chemists, analytical chemists and administrative personnel who are committed to customer satisfaction and continual improvement. This is reflected in our ISO registration and accreditations.

THIS CATALOGUE / NEW PRODUCTS

Originally, Wellington's product line was essentially individual standards of polychlorinated dioxins (PCDDs), dibenzofurans (PCDFs) and biphenyls (PCBs). As can be seen from this catalogue, we now offer a very comprehensive selection of native and mass-labelled PCDDs, PCDFs and PCBs as well as ready-to-use calibration and support solutions for:

PCDD/PCDF methods, such as;

- EPA Method 1613B,
- EPA Method 8280,
- EPA Method 8290,
- EPA Method 23,
- JIS Methods K 0311 and K 0312, and,
- European Standard Method 1948-4.

…and, PCB methods, such as;

- EPA Method 1668C,
- Environment Canada Method 1/RM/31,
- JIS Methods K 0311 and K 0312, and,
- European Standard Method 1948-4 (WHO & Marker PCBs).

Throughout this catalogue, you will also find calibration sets for other target analytes such as PBDEs, PFCs, and PAHs as well as multi-point calibration sets for PCDDs, PCDFs and PCBs. We also have combined calibration sets for PCDDs, PCDFs and WHO PCBs, as well as combined sets for the Marker and WHO PCBs (EN 1948-4).

Since our last catalogue, we have added a number of new native and mass-labelled compounds. All of these were announced in a Wellington Reporter, which were posted on our website (www.well-labs.com).

Most notably, added to our product line are:

- Many new native and 13C-labelled perfluorinated compounds (PFCs)
- New native and 13C-labelled Hexabromocyclododecane mixtures (HBCDs)
- New experimental flame retardants (EFRs)
- New native and mass-labelled organophosphorus compounds
- New native and 13C-labelled halogenated carbazoles
- New native telomer acrylates and acetates

…in addition to many other new and creative products.

SYNTHESIS

The chemical standards offered by Wellington are prepared using unambiguous synthetic routes and purified using a battery of methods. All products are purified to a minimum of 98% chemical purity and the isotopic purity of ^{13}C-labelled products is required to be > 99%. The structure of all of our compounds is unequivocally confirmed using a variety of techniques including, as appropriate, NMR (400 or 600 MHz), HRGC with LRMS and/or HRMS, UPLC-MS/MS, and SFC/UV/MS/MS.

ACCURACY/TRACEABILITY

All of the solutions listed in this catalogue are prepared in our laboratories using:

- NIST- or NRC-traceable weights for microbalance calibration
- Class A, NIST-traceable volumetric glassware
- Distilled-in-glass or HPLC grade solvents
- Replicate solutions to ensure accuracy and confirm homogeneity

When possible, these solutions are compared to standard reference materials or certified standards from another source. The expanded maximum percent relative uncertainty of solution concentrations is ± 5%, unless stated otherwise in this catalogue.

VALIDATION/CERTIFICATION

Wellington was the first supplier of PCDDs, PCDFs and WHO PCBs to validate their solution/mixtures using "truly blind" interlaboratory studies. Since 1991, solutions of our PCDD, PCDF and PCB standards have been submitted as part of 30 international round-robins, resulting in over 2000 independent sets of HRGC/HRMS data.

In addition, over the past several years, Wellington has also submitted standards for 13 interlaboratory studies on PBDEs and 17 studies involving PFCs.

Summaries of all of these interlaboratory studies are available on request. However, in all the studies, averages of the data received for all compounds were well within ± 10% of the design values.

ANALYSIS/DOCUMENTATION

Each of our products comes with a detailed Certificate of Analysis (CofA) which includes data which the end user should be able to replicate using equivalent instrumentation and conditions. The CofA includes HRGC/LRMS and/or HRGC/HRMS data depending upon the intended use of the product. Those compounds that are not amenable to GC analysis come with LC/MS data.

Additionally, all of our mass-labelled products come with data that clearly shows their isotopic purity. All calibration sets include RRF summaries showing the required linearity. SDSs and handling guidelines are available for all products.

OTHER PRODUCTS/CUSTOM REQUESTS

For products not listed in this catalogue, please visit our website for updates or contact us at **info@well-labs.com**. Custom solution preparation and synthetic services are also available.

ORDERING, TERMS, WARRANTY & USE

ORDERING INFORMATION

To place an order, please contact the distributor that serves your country. Distributors are listed on pages **10** and **11**, as well as on our website.

For Canada, and for other countries where we do not have a distributor, please contact:

Wellington Laboratories Inc.
345 Southgate Drive
Guelph, Ontario CANADA N1G 3M5

Telephone: (519) 822-2436
Toll-free: (800) 578-6985
FAX: (519) 822-2849
E-mail: orders@well-labs.com
Website: www.well-labs.com

When ordering, please provide as much information as possible, including:

- Detailed shipping address and billing address
- Purchase order number, if known
- Catalogue number and description of product
- Quantity and unit size

TERMS & CONDITIONS OF SALE

Prices: A price list for the products listed in this catalogue *is available from your local distributor*. Prices are subject to change without notice.

Payment: Payment terms are net 30 days from date of invoice. Past due invoices will be subject to a 1.5% monthly finance charge.

Note: We may also accept credit card payments.

Shipping & Handling: All shipments will be F.O.B. Guelph, Ontario and will be made using an appropriate courier.

Returns: Please contact Wellington Laboratories Inc. or your local distributor for a return authorization number. No credit or exchange will be approved after 30 days from shipment and without prior authorization.

LIMITED WARRANTY

At the time of shipment, all products are warranted to be free of defects in material and workmanship and to conform to the accompanying technical and purity specifications. Wellington Laboratories Inc. makes no other warranty, expressed or implied, pertaining to the suitability of the product for any specific application. In case of breach of this warranty, the entire liability of Wellington Laboratories Inc. will be limited to the invoice price of the goods. In no case will Wellington Laboratories Inc. be liable for any special, incidental or consequential damages resulting from the use of its products.

INTENDED USE

The products prepared by Wellington Laboratories Inc. are for laboratory use only. They are not for use in humans.

These chemicals should only be used by qualified personnel who are familiar with their potential hazards and are trained in their handling. With all of our products, due care should be exercised to prevent human contact and ingestion.

The absence of a toxicity warning on any of our products must not be interpreted as an indication that there is no possible health hazard.

Safety Data Sheets (SDSs) are supplied upon request.

PACKAGING

For the safety and convenience of our clients, the solutions provided by Wellington Laboratories Inc. are packaged in clear or amber glass flame-sealed ampoules. Crystalline materials are packaged in glass vials with teflon-lined screw caps.

The solution volumes stated in this catalogue are the minimum volumes which will be delivered and should be considered as approximate. To retain the accuracy of the solutions, dilutions should be made using volumetric glassware.

END USE ONLY/NOT FOR RESALE

The reference standards and materials supplied by Wellington Laboratories Inc. are for end use only by the original purchaser and are not to be resold without written authorization from Wellington Laboratories Inc.

DISTRIBUTORS

To determine which distributor serves your country, please visit our website at www.well-labs.com and follow the distributor link under order info.

PCDD/PCDF ANALYTICAL METHOD SOLUTIONS

Repeated from our previous catalogues due to their popularity, sets of calibration solutions and support solutions are offered for the following methods:

U.S. EPA Method 1613B
HRGC/HRMS TCDD and TCDF Analysis Solutions
U.S. EPA Method 8280
U.S. EPA Method 8290
U.S. EPA Method 23
European Standard Method EN 1948-4

All of our calibration kits and support solutions are designed and prepared to be used as received according to the procedures set out in their respective methods. They are all accompanied by detailed certificates of analysis which incorporate HRMS data and RRF summaries for the calibration kits.

PCDD/PCDF RESOLUTION TESTING AND WINDOW DEFINING TEST MIXTURES

Also included in this section are the following solution/mixtures of PCDD and PCDF congeners. These are to be used to test and confirm the resolution of the HRGC column being used and to set retention time windows for the PCDD and PCDF congener groups.

CS3WT:	**EPA-1613CS3 calibration solution combined with PCDD/PCDF window defining congeners and 2378-TCDD resolution testing isomers.**
5CWDS:	**PCDD/PCDF window defining congener mix.**
5TCDD:	**2378-TCDD resolution test mixture.**
225TCDF:	**2378-TCDF resolution test mixture.**
TDTFWD:	**Combined PCDD/PCDF window defining and resolution testing mixture for 3 HRGC columns of varying polarity.**

* Working solutions are prepared by diluting EPA-1613LCS (in acetone), EPA-1613CSS (in nonane) and EPA-1613PAR (in acetone) 1:50 (v/v)

CS3WT

This solution allows the HRGC/HRMS operator, with one injection, to:

- Set, or confirm, PCDD and PCDF congener group windows
- Test, or confirm, 2,3,7,8-TCDD resolution
- Verify the calibration

Catalogue Number	Product (nonane solution)	Qty/Conc
CS3WT	EPA Method 1613; Calibration and Verification Solution (CS3) combined with Window Defining and 2378-TCDD Resolution Testing Congeners	500 µl

(WD) - Window Definer

* 1,2,3,4,6,7-Hexachlorodibenzo-p-dioxin (last eluting Hexachlorodibenzo-p-dioxin) was not included as it co-elutes with 1,2,3,7,8,9-Hexachlorodibenzo-p-dioxin. Use the 1,2,3,4,6,7,9-Heptachlorodibenzo-p-dioxin to set the window.

* 1,2,3,4,8,9-Hexachlorodibenzofuran (last eluting Hexachlorodibenzofuran) was not included as it can interfere with 1,2,3,7,8,9-Hexachlorodibenzofuran. Use the 1,2,3,4,6,7,8-Heptachlorodibenzofuran to set the window.

e Total concentration of both isomers

INDIVIDUAL PCDD & PCDF CONGENERS:
NATIVE AND MASS-LABELLED

Wellington has prepared and offers a large selection of individual native and mass-labelled chlorinated dibenzo-p-dioxins (PCDDs) and chlorinated dibenzofurans (PCDFs).

All of these compounds have been synthesized using single product, unambiguous routes and purified using a variety of techniques. Prior to release, their structures and chemical and isotopic purities are confirmed using a number of methods and this data is summarized in the Certificates of Analysis (CofAs).

Accurate solutions of these compounds were prepared as described in the introduction to this catalogue and the maximum percent relative uncertainty associated with their concentrations is ± 5%. In addition, the concentrations of the 2,3,7,8-substituted PCDDs and PCDFs have been continually certified since 1991 through a large number of interlaboratory studies and are thus traceable to these studies.

The following product groups are presented in this section:

Native Chlorinated Dibenzo-p-dioxins (PCDDs)

Native Chlorinated Dibenzofurans (PCDFs)

Mass-labelled PCDDs

Mass-labelled PCDFs

PCDDs & PCDFs:

JAPANESE INDUSTRIAL STANDARD METHODS JIS K 0311 AND JIS K 0312 & ADDITIONAL PCDD/PCDF SPECIALTY SOLUTION/MIXTURES

Wellington has also prepared several other calibration sets containing native and mass-labelled chlorinated dibenzo-p-dioxins (PCDDs) and chlorinated dibenzofurans (PCDFs). Some of these have become quite popular as they are multi-point sets including as many as 13 individual calibration solutions. This allows some flexibility in selecting the calibration range.
In addition, these calibration sets and their support solutions incorporate additional mass-labelled PCDDs and PCDFs which can be used as part of a more involved sampling and sample processing regime.

All of these calibration sets and support solutions are suitable for use with the Japanese Industrial Standards JIS K 0311 and JIS K 0312. In addition, provided that all performance criteria are achieved, they can be used with other regulatory methods from other countries.

In our previous catalogue, we introduced DFP-CVS-B10 which is a combination calibration set for PCDD, PCDF and dioxin-like PCB congener analysis. These solutions remain very popular and will continue to be offered.

PCBs:
ANALYTICAL METHOD SOLUTIONS

The electrophilic chlorination of biphenyl leads to complex mixtures of chlorobiphenyl (PCB) congeners ranging from monochloro- up to decachloro-biphenyl. Although 209 PCB congeners are theoretically possible, only about 150 are found in industrial mixtures and have ended up in the environment.

Certain PCB congeners are considered more toxic than others and are termed 'dioxin-like'. For this reason there are analytical methods that target only these 'dioxin-like' PCBs, while other methods focus on the major PCB congeners in the industrial mixtures. In addition, there are methods that address both groups of PCB congeners.

Wellington has designed, prepared, and offers a number of sets of calibration kits and support solutions for the analysis of individual PCB congeners.

WP-CVS
This set of solutions is to be used for the analysis of the 12 dioxin-like PCB congeners by HRGC/HRMS.

EPA Method 1668C
This series of calibration solutions, and corresponding support solutions, were prepared to be used according to U.S. EPA Method 1668, Revision C.

EPA Method 1668
This calibration kit and support solutions were designed and prepared to be used with the Draft version (March, 1997) of U.S. EPA Method 1668 which is still popular with some laboratories.

EC-9605-CVS
Environment Canada Method 1/RM/31 is a HRGC/LRMS method for PCB analysis and these solutions were prepared to be used with this method.

P48-W-CVS and P48-M-CVS
European Standard Method EN 1948-4 is to be used for analysis of the 12 'dioxin-like' PCB congeners and the 6 'marker' PCB congeners in stationary source emissions. These two calibration kits, and their support solutions, were prepared for this method.

WM48-CVS
This calibration set is a combination of P48-W-CVS and P48-M-CVS.

PCBs:
MASS-LABELLED CONGENERS

Wellington has prepared a very comprehensive collection of fully labelled ($^{13}C_{12}$) individual PCB congeners including the 12 'dioxin-like' PCBs and the more prominent congeners found in commercial mixtures and the environment.

All of the ^{13}C-PCBs in the following pages were prepared using one-product, unambiguous routes and purified using a variety of methods. Their structures and chemical and isotopic purities were confirmed using various instruments and this data is included in the Certificates of Analysis.

Additional ^{13}C-PCBs may be added in the future, so please continue to visit our website for updates or contact **Wellington** or your local distributor if you have any specific requests.

MASS-LABELLED CHLORINATED BIPHENYLS

Catalogue Number		Product
MBP-1		2-Chloro[$^{13}C_{12}$]biphenyl 1.2 ml; 50 µg/ml (±2.5 µg/ml); in nonane

PCBs: SPECIALTY SOLUTION/MIXTURES

A number of additional PCB calibration sets and other solution/mixtures have been prepared and are presented in this section.

PCB-CVS-A10 and PCB-CVS-B10, and their support solutions, were designed and prepared to be used to satisfy the requirements of the Japanese Industrial Standards **JIS K 0311:2005** and **JIS K 0312:2005**. Note that PCB congeners 170 and 180, and their ^{13}C analogues, have been added to the 12 dioxin-like PCBs.

Calibration sets and mixes containing a larger number of PCB congeners, such as PCB-CVS-H, are also offered.

All of the solutions from this section are accompanied by detailed CofAs that include HRGC/LRMS and/or HRGC/HRMS data as appropriate, along with RRF summaries for the calibration sets.

PBDEs & PBBs:
POLYBROMINATED DIPHENYL ETHERS (PBDES) & POLYBROMINATED BIPHENYLS (PBBs)

This section is devoted to polybrominated diphenyl ethers (PBDEs) and polybrominated biphenyls (PBBs) and contains the PBDE calibration solutions listed below:

BFR-CVS calibration set and support solutions
BDE-CVS-F calibration set and support solutions
BDE-CVS-G calibration set and support solutions

Also included in this section are individual native and mass-labelled PBDEs and PBBs as well as selected technical mixtures and individual PBDE metabolites:

Native and mass-labelled PBDEs
Mass-labelled hydroxy-PBDEs
Native and mass-labelled methoxy-PBDEs
Native and mass-labelled PBBs

HALOGENATED FLAME RETARDANTS & RELATED COMPOUNDS

This section is devoted to halogenated flame retardants (HFRs) and related compounds. Since 2012, we have added a number of flame retardants, most notably:

Native and mass-labelled Hexabromocyclododecane (HBCD) mixtures
Native Experimental Flame Retardants (EFRs)
Native and mass-labelled Organophosphorus Compounds
2-Ethylhexyl-d_{17}-2,3,4,5-tetrabromo[$^{13}C_6$]benzoate (MEHTBB)
Bis(2-Ethylhexyl-d_{17})-tetrabromo[$^{13}C_6$]phthalate (MBEHTBP)

This section also contains compounds related to HFRs that are created through metabolism, combustion or other processes, namely:

Native and mass-labelled PBDDs
Native PBDFs
Mixed Br/Cl Dioxins and Furans
Native and mass-labelled Bromophenols

TRIS(2,3-DIBROMOPROPYL)ISOCYANURATE

Catalogue Number		Product
T23BPIC		Tris(2,3-dibromopropyl)isocyanurate 1.2 ml; 50 µg/ml (±2.5 µg/ml); in toluene

2,3,4,5-TETRABROMOBENZOIC ACID (TBBA)

Catalogue Number	Product (methanol solution)	Qty/Conc
TBBA	2,3,4,5-Tetrabromobenzoic acid	1.2 ml 50 µg/ml

^{13}C-LABELLED TETRABROMOBENZOIC ACID (TBBA)

Catalogue Number		Product
MTBBA		2,3,4,5-Tetrabromobenzoic acid [$^{13}C_6$-ring] 1.2 ml; 50 µg/ml (±2.5 µg/ml); in methanol; Isotopic purity; 99% or greater

METHYL-2,3,4,5-TETRABROMOBENZOATE (MeTBBA)

Catalogue Number		Product
MeTBBA		Methyl-2,3,4,5-Tetrabromobenzoate 1.2 ml; 50 µg/ml (±2.5 µg/ml); in toluene

TETRABROMOPHTHALIC ANHYDRIDE (TBPAn)

Catalogue Number	Product (toluene solution)	Qty/Conc
TBPAn	Tetrabromophthalic anhydride	1.2 ml 50 µg/ml

^{13}C-LABELLED TETRABROMOPHTHALIC ANHYDRIDE (MTBPAn)

Catalogue Number		Product
MTBPAn		Tetrabromo[$^{13}C_6$]phthalic anhydride 1.2 ml; 50 µg/ml (±2.5 µg/ml); in toluene; Isotopic purity; 99% or greater

Catalogue Number		Product
TPP		Triphenylphosphate 1.2 ml; 50 µg/ml (±2.5 µg/ml); in toluene
TOTP		Tri-o-tolyl phosphate 1.2 ml; 50 µg/ml (±2.5 µg/ml); in toluene
TMTP		Tri-m-tolyl phosphate 1.2 ml; 50 µg/ml (±2.5 µg/ml); in toluene
TPTP		Tri-p-tolyl phosphate 1.2 ml; 50 µg/ml (±2.5 µg/ml); in toluene
T35DMPP		Tris(3,5-dimethylphenyl) phosphate 1.2 ml; 50 µg/ml (±2.5 µg/ml); in toluene
T2IPPP		Tris(2-isopropylphenyl) phosphate 1.2 ml; 50 µg/ml (±2.5 µg/ml); in toluene
TEP		Tri-ethyl phosphate 1.2 ml; 50 µg/ml (±2.5 µg/ml); in toluene
TPrP		Tri-n-propyl phosphate 1.2 ml; 50 µg/ml (±2.5 µg/ml); in toluene
TBP		Tri-n-butyl phosphate 1.2 ml; 50 µg/ml (±2.5 µg/ml); in toluene
TBEP		Tris(2-butoxyethyl) phosphate 1.2 ml; 50 µg/ml (±2.5 µg/ml); in toluene

NATIVE ORGANOPHOSPHORUS COMPOUNDS

Catalogue Number		Product
TDBPP		Tris(2,3-dibromopropyl) phosphate 1.2 ml; 50 µg/ml (±2.5 µg/ml); in toluene
EHDP		2-Ethylhexyl diphenyl phosphate 1.2 ml; 50 µg/ml (±2.5 µg/ml); in toluene
TEHP		Tris(2-ethylhexyl) phosphate 1.2 ml; 50 µg/ml (±2.5 µg/ml); in toluene
TCEP		Tris(2-chloroethyl) phosphate 1.2 ml; 50 µg/ml (±2.5 µg/ml); in toluene
TCPP		Tris[(2*R*)-1-chloro-2-propyl) phosphate 1.2 ml; 50 µg/ml (±2.5 µg/ml); in toluene
BDCP		Bis(1,3-dichloro-2-propyl) phosphate (97% pure) 1.2 ml; 48.5 µg/ml (±2.4 µg/ml); in acetonitrile
TDCPP		Tris(1,3-dichloro-2-propyl) phosphate 1.2 ml; 50 µg/ml (±2.5 µg/ml); in toluene

Cobourg, Ontario, Canada

PERFLUORINATED COMPOUNDS (PFCs)

Wellington started to synthesize perfluorinated compounds in 2004 and, since then, we have regularly added new native and mass-labelled standards to our inventory. In this section you will find individual standards of the following groups of compounds including, in most cases, mass-labelled analogues as well as some useful solution/mixtures:

PFC-C-CVS Calibration Set and Support Solutions
Perfluoroalkanesulfonates (PFASs)
Perfluoroalkylcarboxylic acids (PFCAs)
Perfluorooctanesulfonamides (FOSAs)
Perfluorooctanesulfonamidoethanols (FOSEs)
Perfluorooctanesulfonamidoacetic acids (FOSAAs)
Fluorinated Telomer Alcohols (FTOHs)
Fluorinated Telomer Acids (FTAs)
Unsaturated Fluorinated Telomer Acids (FTUAs)
Perfluoroalkylphosphonic Acids (PFAPAs)
Perfluoroalkylphosphinic Acids (X:XPFPi)
Polyfluorinated Phosphate Esters (PAPs and SAmPAPs)
Fluorinated Telomer Acrylates and Acetates (FTAcrs and FTOAcs)

PFCs are still emerging environmental contaminants and each of the groups of compounds listed above pose unique analytical challenges. In addition, the individual isomers, such as the branched PFOA and PFOS isomers, are being found to have different toxicokinetic and ecokinetic properties. Thus our inventory of PFCs will continue to grow and we would urge you to visit our website for announcements of new products.

CERTIFIED REFERENCE MATERIALS

Wellington currently offers three certified reference materials (CRMs) for use in testing an analytical lab's ability to generate accurate and reproducible data using real, as opposed to fortified, samples.

The following CRMs are currently offered:

WMS-01: Lake Sediment for Organic Contaminant Analysis.

WMF-01: Freeze-Dried Fish Tissue for Organic Contaminant Analysis.

CARP-2: Fish Tissue for Organic Contaminant Analysis.

More details on each of these CRMs, including the analytes and their certified values, are given in the following section.

WMS-01: REFERENCE LAKE SEDIMENT for ORGANIC CONTAMINANT ANALYSIS

Catalogue Number	Product	Qty/Conc
WMS-01	Reference Lake Sediment, WMS-01	25 g

Chlorinated Dibenzo-p-dioxins (PCDDs)	Certified Reference value (pg/g)
2,3,7,8-Tetrachlorodibenzo-p-dioxin	17.7 ± 5.6
Total Tetrachlorodibenzo-p-dioxins	**60.1 ± 25**
1,2,3,7,8-Pentachlorodibenzo-p-dioxin	7.96 ± 2.8
Total Pentachlorodibenzo-p-dioxins	**69.5 ± 23**
1,2,3,4,7,8-Hexachlorodibenzo-p-dioxin	8.66 ± 2.7
1,2,3,6,7,8-Hexachlorodibenzo-p-dioxin	20.8 ± 4.8
1,2,3,7,8,9-Hexachlorodibenzo-p-dioxin	17.3 ± 8.0
Total Hexachlorodibenzo-p-dioxins	**238 ± 86**
1,2,3,4,6,7,8-Heptachlorodibenzo-p-dioxin	293 ± 63
Total Heptachlorodibenzo-p-dioxins	**608 ± 152**
Octachlorodibenzo-p-dioxin	1899 ± 456
Chlorinated Dibenzofurans (PCDFs)	
2,3,7,8-Tetrachlorodibenzofuran	52.5 ± 16
Total Tetrachlorodibenzofurans	**374 ± 162**
1,2,3,7,8-Pentachlorodibenzofuran	12.6 ± 5.0
2,3,4,7,8-Pentachlorodibenzofuran	18.5 ± 6.1
Total Pentachlorodibenzofurans	**225 ± 113**
1,2,3,4,7,8-Hexachlorodibenzofuran	67.3 ± 24
1,2,3,6,7,8-Hexachlorodibenzofuran	20.3 ± 8.7
1,2,3,7,8,9-Hexachlorodibenzofuran	2.68* ± 4.0
2,3,4,6,7,8-Hexachlorodibenzofuran	16 ± 8.0
Total Hexachlorodibenzofurans	**262 ± 95**
1,2,3,4,6,7,8-Heptachlorodibenzofuran	299 ± 73
1,2,3,4,7,8,9-Heptachlorodibenzofuran	15.1 ± 4.6
Total Heptachlorodibenzofurans	**411 ± 100**
Octachlorodibenzofuran	509 + 157
Chlorinated Biphenyls (PCBs-IUPAC)	
3,3',4,4'-Tetrachlorobiphenyl (77)	1717 ± 520
3,4,4',5-Tetrachlorobiphenyl (81)	75* ± 79
2,3,3',4,4'-Pentachlorobiphenyl (105)	3998 ± 951
2,3,4,4',5-Pentachlorobiphenyl (114)	207 ± 128
2,3',4,4',5-Pentachlorobiphenyl (118)	8115 ± 1663
2',3,4,4',5-Pentachlorobiphenyl (123)	209 ± 191
3,3',4,4',5-Pentachlorobiphenyl (126)	84.9 ± 35
2,3,3',4,4',5-Hexachlorobiphenyl (156)	715 ± 248
2,3,3',4,4',5'-Hexachlorobiphenyl (157)	186 ± 81
2,3',4,4',5,5'-Hexachlorobiphenyl (167)	330 ± 85
3,3',4,4',5,5'-Hexachlorobiphenyl (169)	7.97 ± 5.3
2,3,3',4,4',5,5'-Heptachlorobiphenyl (189)	85.2 ± 17.8

* Provisional value for information purposes only. Any negative deviation is inadmissable.
The concentrations of these analytes may be certified at a later date as more data becomes available.

WMF-01: REFERENCE FISH TISSUE for ORGANIC CONTAMINANT ANALYSIS

Catalogue Number	Product	Qty/Conc
WMF-01	Reference "*Freeze-Dried*" Fish Tissue, WMF-01	1 x 10 g

NATIVE CHLORINATED BIPHENYLENES (PCBPs)

Chlorinated Biphenylenes have been detected in samples taken in the aftermath of PCB fires. It is thought that they may be formed as the result of incomplete combustion of the PCBs.

In microsomal enzyme studies, the 2,3,6,7-tetrachlorobiphenylene has shown similar potency to that of 2,3,7,8-tetrachlorodibenzo-p-dioxin in its toxicological effects.

NATIVE TRICLOSAN AND METHYL TRICLOSAN

Triclosan is a widely used antibacterial and antifungal agent that has been incorporated into many common consumer products including toothpastes, deodorants, antibacterial soaps, and detergents.

The increasing use of these products over the last 30 years has led to Triclosan, and its biotransformation product, Methyl Triclosan, being found in the environment.

CHLORINATED DERIVATIVES OF TRICLOSAN AND METHYL TRICLOSAN

The reaction of Triclosan with free chlorine in water, or during wastewater treatment processes, may result in the formation of further chlorinated Triclosan isomers.

General Structure and
Numbering System for Carbazoles

Ingrid O'Gorman
South River, Ontario, Canada

APPENDIX

Some of the information provided in this Appendix can also be found in our **Reference and Handling Guide: GC/MS Characterization and Analysis of Selected Halogenated Aromatic Compounds**, which is available separately in hard copy and is also posted on our website. On the following pages you will find:

Guidelines for the Use and Handling of Wellington Products

General Structure and Numbering System of Selected Aromatic Hydrocarbons

Number of Possible Isomers for Selected Halogenated Aromatic Compounds

Molecular Weights for Selected Chlorinated and Brominated Aromatic Hydrocarbons

Exact Mass & Relative Ion Abundance of Selected Chlorinated Aromatic Hydrocarbons

Molecular Ion Clusters for Chlorinated Aromatic Hydrocarbons & Brominated Aromatic Hydrocarbons

Exact Mass & Relative Ion Abundance of Selected Brominated Aromatic Hydrocarbons

Systematic Numbering of Chlorinated Dibenzo-p-dioxins, Chlorinated Dibenzofurans, Chlorinated Biphenyls, and Chlorinated Naphthalenes

We have also prepared a **Reference and Handling Guide for Perfluoroalkyl Compounds**, which can be downloaded from our website, and a more concise **Quick Reference Guide for Perfluoroalkyl Compounds**, which is available in hard copy.

If you would like to receive copies of either Reference Guide, please contact us or one of our distributors. In addition, if you have any ideas on how we can improve these Reference Guides, or if you have suggestions for future guides, please contact us.

HAZARDS

The majority of our products are halogenated aromatic hydrocarbons in solution in organic solvents such as nonane, toluene and isooctane. Although the maximum concentration is 100 µg/ml, that is 0.01% (w/v), these compounds must be considered toxic and potentially carcinogenic and should be handled accordingly.

With all of our products due care should be exercised to prevent human contact and ingestion. The absence of a toxicity warning for any of our products must not be interpreted as an indication that there is no possible health hazard.

NOTE:
THESE MATERIALS SHOULD ONLY BE USED BY PERSONNEL TRAINED IN THE HANDLING OF HAZARDOUS CHEMICALS.
ALL PROCEDURES SHOULD BE PERFORMED IN A FUME HOOD AND SUITABLE GLOVES, EYE PROTECTION AND CLOTHING SHOULD BE WORN AT ALL TIMES.

RECEIPT, INSPECTION, HANDLING AND STORAGE

Unless crystalline material is provided, all of our reference standard solutions come in flame-sealed, pre-scored amber glass ampoules. Upon receipt, inspect the ampoules for breakage and leakage and then store them upright until needed. The ampoules can be stored at ambient temperature until opened unless other storage requirements are stated on the Certificate of Analysis.

Prior to opening, allow the solution to drain into the bottom of the ampoule, lightly tapping the ampoule if necessary. Using the plastic ampoule collar provided, hold the ampoule upright and snap the top off, breaking away from the body.

Transfer the solution to an amber glass container that can be tightly sealed for storage. To prevent evaporation of the solvent, it is suggested that this solution, and subsequent mixtures and/or dilutions, be stored at refrigerator temperatures.

DISPOSAL

All waste materials generated during the use of these solutions should be treated as hazardous in accordance with national and regional regulations. A licensed disposal company should be employed. Some options for the destruction of these materials include high temperature incineration, photolysis, or chemical treatment using reagents such as sodium naphthalene or KPEG reagent. Literature references for some of these methods can be provided upon request.

ACCURACY

Each of our stock solutions is prepared from crystalline material that has been well characterized as to its structure and purity.

The crystalline material is weighed using microbalances that are externally calibrated using NIST-traceable weights. Solutions are prepared by completely dissolving the crystalline material in ultrapure, distilled-in-glass solvents. The volumetric flasks used for this purpose, and the pipets used for subsequent preparation of dilutions and mixtures, are all of class A tolerance and NIST-traceable.

The maximum percent relative combined uncertainty for solution preparation is calculated to be ± 5%.

INTERLABORATORY CERTIFICATION

Wellington continues to submit its standards for independent interlaboratory testing and certification. Since 1991, our standards have been tested in 30 international round-robins.

To date, solutions of the compounds listed below have been repeatedly tested and the approximate total number of analyses are given.

- 2,3,7,8 - substituted PCDDs and PCDFs .....1500 HRMS analyses
- Dioxin-like (WHO) PCB congeners .....1000 HRMS analyses
- PBDEs .....200 HRMS analyses
- PFCs .....200 LCMS analyses

The overall averages of the data received for all of the compounds were found to be well within ± 10% of the design values.

EXPIRY DATE/SHELF LIFE

In order to accurately determine the shelf life of products such as ours, testing must reveal significant degradation or loss in concentration of the particular analyte. In comparing freshly prepared solutions to older solutions by GC/MS or LC/MS, we have not detected any significant changes. Many of these older solutions were prepared and ampouled more than 15 years ago. Thus our stability studies, as they should, remain ongoing.

For our products where the expiry date on the C of A states, "stability studies ongoing", we consider that our reference standard solutions retain their accuracy for a period of 5 years from delivery in the unopened ampoule.

NOTE: The predominant degradation pathway for our compounds is likely photolysis and thus protection from light is critical.

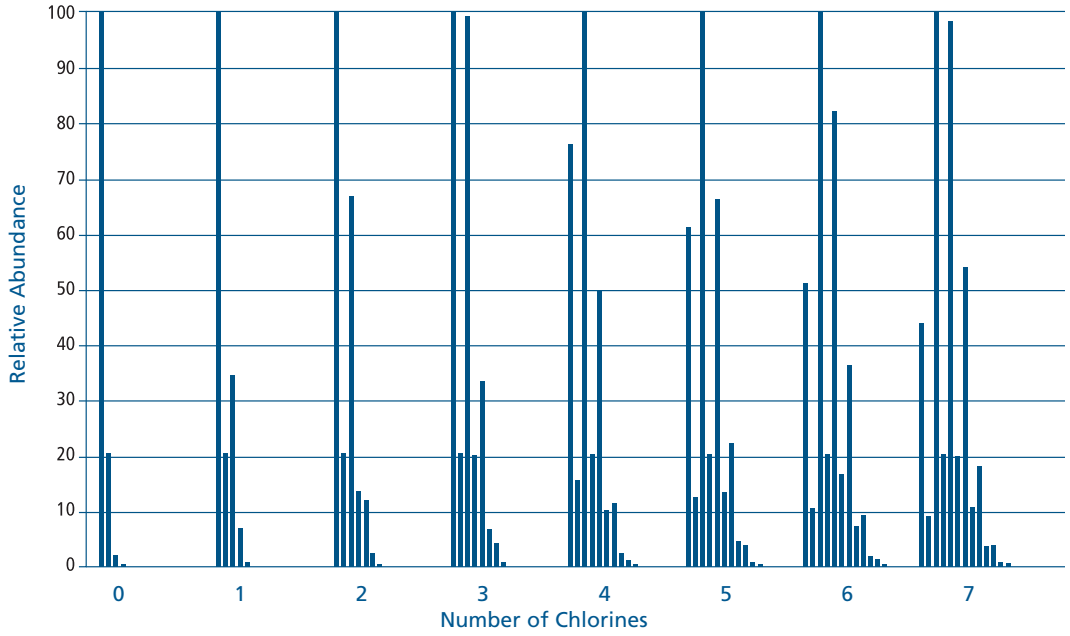
PCTs = polychlorinated terphenyls
PCBs = polychlorinated biphenyls
PCHBs = polychlorinated hydroxybiphenyls
PCDDs = polychlorinated dibenzo-p-dioxins
PCDFs = polychlorinated dibenzofurans
PCNs = polychlorinated naphthalenes
CBs = chlorobenzenes
CPs = chlorophenols

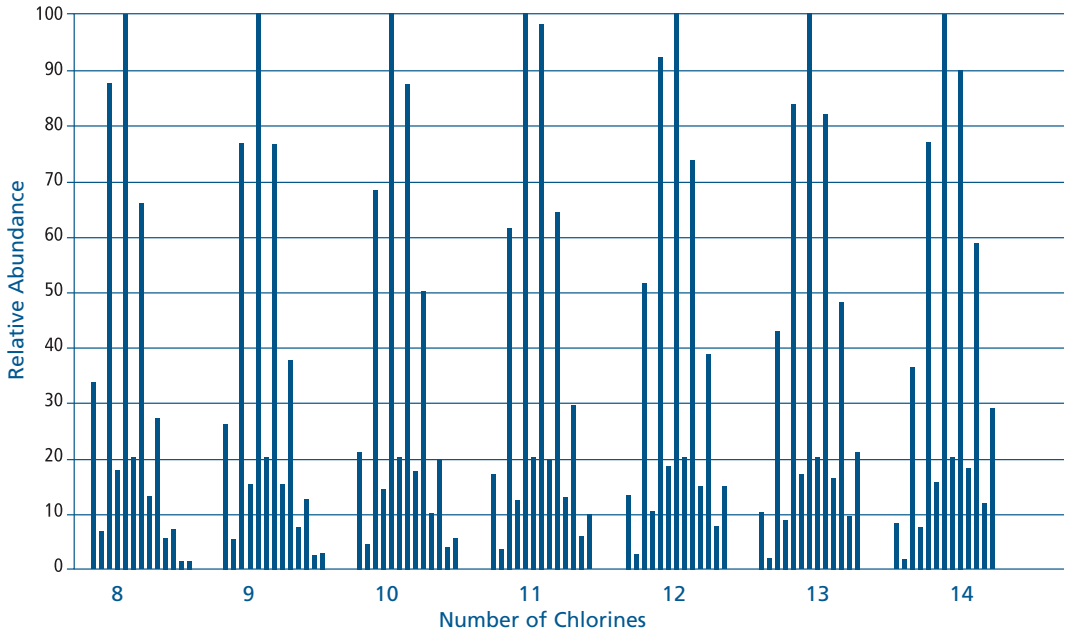
Accurate masses: ^{12}C=12.000000, ^{13}C=13.003355, ^{1}H=1.007825, ^{35}Cl= 34.968853, ^{37}Cl=36.965903, ^{16}O=15.994915

Relative abundances of isotopes were determined using the method described in: Pretsch,Clerc,Seibl,Simon,
Tables of Spectral Data for Structure Determination of Organic Compounds, Springer-Verlag, 1983.
The following natural isotopic abundances were used in all calculations: ^{12}C=98.89%, ^{13}C=1.11%, ^{1}H=99.985%, ^{2}H=0.015%, ^{35}Cl=75.53%, ^{37}Cl=24.47%, ^{16}O=99.759%, ^{17}O=0.037%, ^{18}O=0.204%.

MOLECULAR ION CLUSTERS FOR CHLORINATED AROMATIC HYDROCARBONS

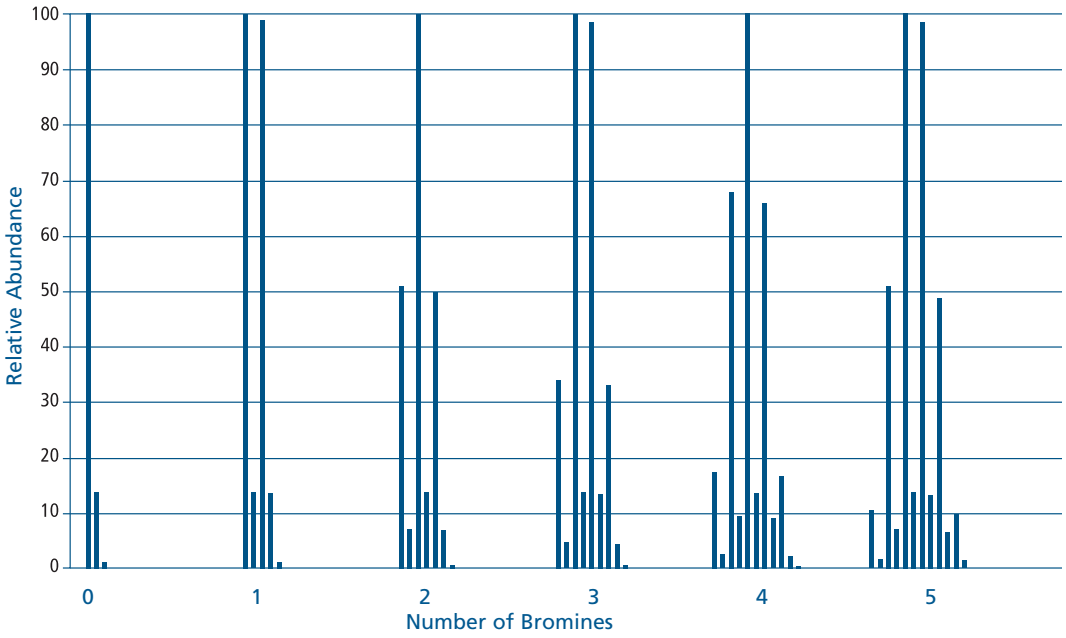


MOLECULAR ION CLUSTERS FOR CHLORINATED AROMATIC HYDROCARBONS

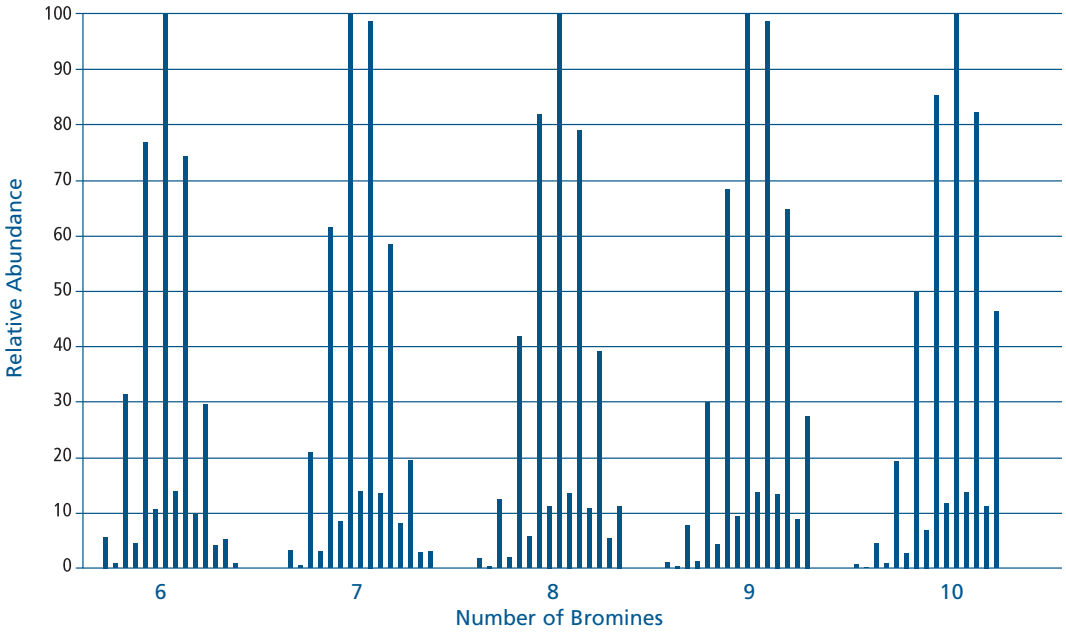


Ions shown are M, M+1, M+2, M+3, M+4, M+5, M+6, M+7, M+8, M+9, M+10, M+11, M+12, and are representative of chlorinated terphenyls ($C_{18}H_{14-n}Cl_n$)

MOLECULAR ION CLUSTERS FOR BROMINATED AROMATIC HYDROCARBONS



MOLECULAR ION CLUSTERS FOR BROMINATED AROMATIC HYDROCARBONS



Ions shown are M, M+1, M+2, M+3, M+4, M+5, M+6, M+7, M+8, M+9, M+10, M+11, M+12, M+13, M+14 and are representative of brominated diphenyl ethers ($C_{12}H_{10-n}Br_nO$)

PBBs = polybrominated biphenyls
PBDEs = polybrominated diphenyl ethers
PBDDs = polybrominated dibenzo-p-dioxins
PBDFs = polybrominated dibenzofurans

Accurate masses: ^{12}C=12.000000, ^{13}C=13.003355, ^{1}H=1.007825, ^{79}Br= 78.918300, ^{81}Br=80.916300, ^{16}O=15.994915

Relative abundances of isotopes were determined using the method described in: Pretsch,Clerc,Seibl,Simon, Tables of Spectral Data for Structure Determination of Organic Compounds, Springer-Verlag, 1983.
The following natural isotopic abundances were used in all calculations: ^{12}C=98.89%, ^{13}C=1.11%, ^{1}H=99.985%, ^{2}H=0.015%, ^{79}Br=50.54%, ^{81}Br=49.46%, ^{16}O=99.759%, ^{17}O=0.037%, ^{18}O=0.204%.

CERTIFICATE OF ACCREDITATION

ANSI-ASQ National Accreditation Board
500 Montgomery Street, Suite 625, Alexandria, VA 22314, 877-344-3044

This is to certify that

Wellington Laboratories Inc.
345 Southgate Drive
Guelph, Ontario, Canada N1G 3M5

has been assessed by ANAB
and meets the requirements of international standard

ISO Guide 34:2009

while demonstrating technical competence in the field(s) of

Reference Material Producer

Refer to the accompanying Scope(s) of Accreditation for information regarding the types of materials to which this accreditation applies.

AR-1523
Certificate Number

ANAB Approval

Certificate Valid 02/17/2015-02/17/2017
Version No. 001 Issued: 02/19/2015
